## Make A Lasting Impression

Homeowners experience the ultimate peace of mind knowing that their siding will look just as beautiful as the day it was installed, year after year, decade after decade.

# EVERLAST®

*Advanced Composite Siding*

## Easy & Fast Installation

There are no special tools required to install Everlast siding. It's less than half the weight of fiber cement and produces no harmful dust when cut. Everlast Lap Siding's EZStack joinery ensures a speedy and level installation and you can install planks from left to right or vice versa.

Everlast lap siding installs with virtually any pocketed trim package and flashing at seams is not required. The one-piece Everlast Board & Batten, with an integral batten, speeds installation. And, again, there's no caulking or painting.

Each Everlast plank-to-plank seam is joined with a stainless steel bracket to produce the tightest, longest lasting, and best looking seams on the market.

## Proven Durability

Since 2009, Everlast siding has been installed on hundreds of homes, multi-family facilities, and light commercial buildings.

Everlast siding performs precisely as science and accelerated weather testing predict – beautifully.

Homeowners can be confident that Everlast siding is the final siding they will ever purchase.

## Best Overall Value

Due to its quick installation, Everlast siding's on the wall cost (material and labor) is competitive with fiber cement siding. Plus, since Everlast siding eliminates caulking and painting, homeowners receive recurring cost savings.

## Advanced Material Science

Everlast siding is simply smarter material science. It features a mineral-enriched composite substrate molecularly fused to an advanced UV-resistant acrylic capstock – enhanced with an embossed natural woodgrain pattern. Proven benefits:

-  Eliminates the need for painting
-  Reduced expansion and contraction
-  Outstanding fade protection
-  Virtually impervious to water
-  No rotting, warping, or splitting
-  Superior impact resistance
-  Insect-resistant
-  Withstands high wind loads
-  Suitable for any environment

## Design Options Homeowners Want

Everlast siding is available in a wide range of designer curated popular colors, in two widths of Lap Siding, Board & Batten Siding, and Premium Color-Matched Trim. Plus an optional all-white cellular PVC trim package is also available.
